BOOKLET**
(Worth \$87.85)

\$300 \$235 WOM From \$62 WOM \$98 \$78

Buy the Basic Album + a Supplement & Get all
3 Collectors Guide for 20% OFF.

Each Album Supplement covers the varieties of those issues: British New Guinea and the De La Rye issues, Papua (lithographs) Issues and the Lakatoi (Papua typograph) Issues. These are supported by the Collectors Guide booklets that provides detailed explanations, tables and scans enabling you to build your collection in knowledge with confidence. **WOM – With Out Mounts.**

- Available with or without MOUNTS in Simplified or Extended format
- Lighthouse Binder available as an optional extra.

**Strong AUD\$ has meant we can offer SAFE at below
previous retail prices until stock sold out!**

- Never be in doubt about WATERMARKS again.**

Use the SAFE electronic watermark reader. It's not cheap but it's quality and it works. We guarantee your satisfaction. Both Mark and I only use this SAFE model. We've tried cheaper ones, but with mixed results; a waste of money!

- Uses a position lever (handle) for fast removing and inserting stamp tray and to adjust pressure:
- On-off light switch · Contrast adjuster · 7.5 Volt light output.
- Maintenance free.
- For stamps up to size 2" x 2"
- Operates on 5 "AA" (1.5 Volt) batteries, or an optional AC Adapter with 7.5 Volt DC output
- Weight: 1lb. 15 oz. (0.8 kgs)
- Size: 8" x 4-1/4" x 5-3/4"H

**\$450
\$363**

Still the **ONLY** one on the world wide market! A real success story and a great gift idea! Make your dreams come true! The units are worth far more than what they cost. One single newly discovered watermark or a newly identified watermark variation can make up, several times over, for the money spent to buy a SAFE Signoscope.

3. Electronic Perforations Reader

The PERFOtronic automatically measures by rounding up or down to the next 1/4 perforation shown in stamp catalogs. The processor of the unit is able to calculate around missing perforations or perforation mistakes.

- Measures the perf. value within a fraction of a second with the help of light sensors
- Nothing touches your stamp, therefore no damage possible
- Accurate to 1/100 mm
- Displays in 1/4 increments, i.e. 14.25, 14.5, 14.75, 15, etc.
- Operates on an AC adapter with 12 Volt DC output (supplied)
- Use on regular or large stamps, coils and stamps with margins
- Maintenance free
- Size: 7-1/2" x 5-1/2" x 2-1/2" High
